

GRATEFUL WOMEN RESTORED TO BEAUTY AND HEALTH BY PE-RU-NA.

Neglected Colds and Spring Catarrh Make Invalids of More Women at This Season of the Year Than All Other Diseases Combined.

"An Ounce of Prevention is Better Than a Pound of Cure."

How to Protect Yourself Against Catarrh During the Uncertain Weather of May.

"Keep the feet warm and dry. Also keep the chest well protected. Be sure to go out in the fresh air every day, so as to be accustomed to outdoor air."

HEALTH HINTS FOR MAY. The following of these rules will secure to each individual a reasonable guarantee against colds, coughs, catarrh, spring fever, and so forth, in spite of chills, wet, rain or sudden changes of temperature.

If, however, you are already the victim of a cough, loose or tight, catarrh, acute or chronic, the remedy that relieves rapidly, cures quickly and restores permanently is Peruna.

A few doses of Peruna at the beginning of a cold will change the entire course of events. It operates directly on all the mucous membranes, so that no matter where the cold may have settled it is bound to be reached by this searching remedy. Peruna absolutely prevents catarrh from fastening itself upon any part of the organism.

Miss Lydia Herziger, Grand Recorder of American Daughters of Independence, writes from Newhall, Wis., as follows: "I have used Peruna now for four years, each spring and fall, and it keeps me perfectly well and strong. I am able to continue working, and do not have to take a three months' rest, as I used to do every year. This is a great comfort to me, as I was not able to afford such a long rest. I find that it is a preventive for colds and coughs and soon rids the system of all disease and is an admirable medicine."

Mrs. Frances Wilson, 32 Nelson street, Clinton Mass., writes: "Had you seen me at the time of my illness and now, you would not wonder that I take delight in sounding the praises of Peruna. My ailment was a severe cold which attacked the bronchial tubes, and after using six bottles of Peruna I was on my feet again. I think Peruna a wonderful medicine."

Miss Edna Wilson, 1445 Temple street, Los Angeles, Cal., writes: "I have used Peruna for four years, each spring and fall, and it keeps me perfectly well and strong. I am able to continue working, and do not have to take a three months' rest, as I used to do every year. This is a great comfort to me, as I was not able to afford such a long rest. I find that it is a preventive for colds and coughs and soon rids the system of all disease and is an admirable medicine."

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a statement of your case. He will be pleased to give you his valuable advice. Address Dr. Hartman, President of the Hartman Sanitarium, Columbus, Ohio.

MR. J. C. MORRISON.

The Testimonials Given Here are Only a Few of Thousands of Testimonials From Thankful Women.

Cure a Cold Before It Develops Into Catarrh.

At the Beginning of a Cold is the Time to Take Pe-ru-na.

Mrs. C. Morrison, 1,030 S. New Jersey St., Indianapolis, Ind., writes:

"Some months ago I contracted a severe cold returning from the theatre. This cold settled in my head and developed into catarrh of the head and nose, and I know of nothing more obnoxious. Every morning when I arose my head was all stopped up, throat dry and parched, and I would have to spray for half an hour before I could clear the head. I noticed that Peruna was advertised as a certain cure for catarrh, so I tried what it would do for me, and found after four weeks' use that it had cleared my head and throat, leaving no trace of catarrh. I therefore wish to add my testimony to the many you have as to the efficacy of Peruna."—Mrs. C. Morrison.

Spring is the best time to treat catarrh. Nature renews herself every spring. The system is rejuvenated by spring weather. This renders medicines more effective. A short course of Peruna, assisted by the balmy air of spring, will cure old, stubborn cases of catarrh that have resisted treatment for years. Everybody should have a copy of Dr. Hartman's latest book on catarrh.

With healthy mucous membranes climatic diseases lose their terror, the system is enabled to throw off contagion and health inevitably follows.

MISS BERTHA M. RUSH, OF PITTSBURG.

Miss Rush Suffered With Systemic Catarrh—was Nervous, Had No Appetite, Grew Thin and Emaciated. She Now Looks Like a New Woman After a Course of Pe-ru-na.

Miss Bertha M. Rush, 5435 Kincardine street, Pittsburg, Pa., Superintendent Junior Society of Methodist Protestant Church, and leading soprano of the choir, writes: "Words cannot describe my thankfulness to you for Peruna. I was a sufferer from systemic catarrh for years and was in a very much run down condition. I was extremely nervous and had the most foolish fears over nothing. I was thin and emaciated."

"My physician advised me to leave this climate, but as it was not convenient to do so at this time, I took the advice of a friend to use a bottle of Peruna. I took it faithfully, and when the first bottle was gone I felt much better. I bought six more and took them faithfully, after which I looked like a new woman. "I gained in flesh, my appetite returned and all my old symptoms had disappeared. I am more than thankful to Peruna."—Miss Bertha M. Rush.

A Prominent Wisconsin Club Woman Gives Grateful Thanks to Pe-ru-na.

ANNOYING SYMPTOMS.

"Peruna Cured Me After Using Only Seven Bottles."—Mrs. M. S. Rogers.

Peruna is Known in All Parts of the Civilized World. Nowhere in the United States is There to be Found a Household That Has Not Heard of Peruna, and Very Few, Indeed, Have Not at Some Time or Other Used It. Peruna is Now Acknowledged to be a Shield Against the Encroachments of Catarrh and a Remedy For All Forms of Catarrhal Diseases. It Ought to be in Every House.

Mrs. M. S. Rogers.

"I Feel Like a Different Woman Now and Am Never Troubled With Any Catarrhal Symptoms."

Mrs. M. S. Rogers, Vice-President of the Yonah Mothers' Club, writes:

"For years I was troubled with catarrh of the head and did not know what was the matter with me. I was rarely without a headache over my eyes, and when I took cold my head stopped up. The discharge from my head was very obnoxious, my breath was bad and I was miserable for months."

"A friend suggested that I try Peruna, and as I had heard of it before, I gladly did so. My experience was the same as many others who have used it. It cured me after using only seven bottles."

"I feel like a different woman now, and am never troubled with headaches, nor offensive breath, nor any of the evils resulting from catarrh."—Mrs. M. S. Rogers.

WILL FIGHT IN CLOUDLAND.

ENGLAND'S WAR ON TIBET TO BE A MOUNTAIN CAMPAIGN.

The Grand Lama Can Retreat to Regions Said to Be Impregnable—English Can Take Lhasa Easily, but Capturing Ruler and Advisers is Another Thing.

Special Cable Dispatch to THE SUN. LONDON, May 14.—"That strange force which has so often driven the English forward against their will appears to be in operation once more."

This characteristic utterance is conceived to be all the explanation necessary of the expedition which is developing into a war against Tibet. It is used by the Spectator to justify the so-called unwilling subjugation of that mysterious land against which a small army must now be sent.

It is quite true that having once embarked on a policy of making a demonstration in Tibet no choice remains but to fight the way into Lhasa itself, and such is the result of the Government's decision. It will not be child's play, although the enemy to be feared is not the Tibetans, but nature's almost impregnable defenses in that wild, almost inaccessible land.

It proves that the Dalai Lama is really a strong, clever man, despite his ignorance of civilization and its resources. It has been the custom of the Tibetans for ages to poison the Dalai Lama, who is regarded as the incarnation of Buddha, before he reaches manhood.

The present incumbent was able to secure an abrogation of this unpleasant custom, and he is now a man of 30, possessing absolute power. He recently removed his four principal Ministers, under the advice of M. Dorjoff, whom Russia employed as her agent, and decided to resist the advance of the British expedition.

The artificial means of resistance are insignificant beyond the untrained strength of his so-called giants, whom he summoned to defend the country, but the natural defenses, of which he will undoubtedly take full advantage, are enormously strong. All the fighting will probably take place in the clouds at a greater elevation than the Alps. It promises, therefore, to be one of the most picturesque and most memorable campaigns of recent times.

There is reason to fear that the success of English arms will avail little. They may occupy Lhasa without serious loss, but if the Grand Lama chooses to flee further into the mountains he will be able to elude the British and the British difficulties will then be serious.

The British cannot hunt the Lama among the clouds as they hunted the Mad Mullah through the deserts of Somaliland, while to hold Lhasa would be expensive and not worth while. Nevertheless, the world's largest army may count on a weird, enthralling spectacle, and Tibet will probably be writ large in history in the next few months.

FIGHTING IN ARMENIA. 700 Turks and 900 Armenians Said to Have Been Killed.

Special Cable Dispatch to THE SUN. LAUSANNE, Switzerland, May 14.—A dispatch to the Gazette from Batoum, Armenia, says that 700 Turks and 900 Armenians have been killed in recent fighting in the Sassoun district.

INFANT MORTALITY AND MILK.

London's Inadequate Supply of Lactical Fluid Causing Deaths of Children.

Special Cable Dispatch to THE SUN.

LONDON, May 14.—One of the things in which London is far behind New York is the method and quality of its milk supply, the importance of which Sir James Crichton-Browne dwelt upon at the annual meeting of the Sanitary Inspectors' Association.

He laid particular stress on the importance of children being fed naturally. The nature of substitutes for mother's milk, he said, was responsible for the increasing infantile mortality. Of the 15,000 infants who are dying in England annually in the first year of their life, three-fourths have been fed artificially.

In France the mortality among suckled children is 8 per cent., while among hand-fed it is 61 per cent. Patent foods, he declared, all should be condemned, as their exclusive use often leads to anemia, rickets and scurvy. He urged the further use of milk for adults. In certain sicknesses, such as typhoid, life may depend on milk, which may not only postpone the final issue in certain kinds of acute disease, but contribute to the stability of vigor in maturity. He drew attention to the value of the goat as a milk producer.

EARTHQUAKE WAS UNREPORTED.

10,000 People Made Homeless in the Balkans on Easter Monday.

Special Cable Dispatch to THE SUN.

LONDON, May 14.—A man who recently returned from Sofia writes to the newspapers giving a description of the results of a Balkan earthquake on Easter Monday. He says that practically no one noticed the shaking, though it must have been of extraordinary magnitude.

Two thousand houses were destroyed and 10,000 people made homeless in a fertile valley in which lies Jumabala, the scene of the disaster. The writer describes a slide through the villages a week after the seismic disturbance. Houses were levelled to the ground and there were huge cracks across the streets. Sulphurous streams of mud and water were ruining the crops.

The smashed arsenals of the Khan were crumbling to the ground and the Government buildings littered the earth like rubbish heaps. Amid the tragic confusion the poor people, who were dazed and confused, were silent, but were striving to repair the damage to their homes, although this was almost hopeless, as they have little capital and meagre resources.

PARIS WASHERWOMEN ALARMED.

They Object to Health Regulations Submitted to the Authorities.

Special Cable Dispatch to THE SUN.

LONDON, May 14.—Paris washerwomen are alarmed and disgusted at the new-fangled notions adopted by the Board of Health, which has submitted a series of recommendations to the Minister of Commerce. The most drastic of these seek to compel laundresses to enclose all dirty linen in airtight bags when they are conveying them from place to place.

Before the washing is begun the linen must be disinfected, and worst of all, when the washing does start the laundresses will be compelled to wear specially made gutta percha gloves.

These and other regulations are recommended with a view of preventing the spread of infection.

TALL BUILDINGS TO BLAME.

Where They Exist an English Physician Finds Children's Heads Shrinking.

Special Cable Dispatch to THE SUN.

LONDON, May 14.—The inquiry as to the physical degeneration of the British people continues. The most recent feature was the examination by Dr. Warner of 100,000 London children. He reports that one sign of degeneracy is that the heads of children are growing smaller, especially the females.

This is closely connected, it is said, with the erection of high buildings. Dr. Warner does not offer any explanation of this theory, but says that where residences are of great height and size a larger proportion of small heads are found.

The condition of affairs is worse in Kensington than in Whitechapel and Bethnal Green. It is bad in all districts where there are lofty buildings. The doctor suggests the possibility that the want of light and air caused by the high buildings is the reason for the small heads in certain districts.

GOLD IN THE PHILIPPINES.

Rich Strike Reported by an American Prospector in the Camarines.

Special Cable Dispatch to THE SUN.

MANILA, May 14.—Advisers from the provinces of the Camarines report a rich gold strike by an American prospector, who is said to have extracted 128 ounces in a short time, though he is using only primitive methods.

Chief of the Bureau of Mines McCaskey says that he is not surprised at the report, as his information has been such as to point to the existence of rich veins and placers in the district.

The provinces of North and South Cebu are situated on Luzon Island to the southeast of Manila. Both are mountainous and have magnificent forests. The southern part has many fine valleys in which rice, corn and sugar cane are raised.

In the mountains of the northern part it has been known for a long time that there were large deposits of gold, silver, iron, copper and lead. The capital, Neuva Caceres, a city of about 12,000 inhabitants, is 207 miles from Manila.

CHRISTIANITY IN INDIA.

Growth Has Been More Rapid Than the Increase in Population.

Special Cable Dispatch to THE SUN.

LONDON, May 14.—The census of India for 1901 shows that the growth of Christianity has been comparatively far more rapid than the growth of the general population. In 1872 the Christians in India numbered 1,506,098, of whom 1,246,288 were natives. In 1901 the Christians numbered 2,923,241, of whom 2,644,313 were natives.

Of the latter number two-fifths were Catholics.

DOWIE IS IN LONDON.

Leaves His Wife and Son in Ceylon and He Hurries Westward.

Special Cable Dispatch to THE SUN.

LONDON, May 14.—Alexander Dowie, of Zion fame, has arrived in London, having left his wife and son in Colombo, Ceylon. He came to Marseilles on the steamer Mongolia, which left Sydney on March 30.

The remainder of the journey he made overland.

KING PETER DREAM-TORTURED.

SERBIA'S RULER IN BAD SHAPE PHYSICALLY.

Has Great Depression and Suffers From Insomnia—Dreams He Sees Ex-King Milan Rushing Through the Palace With Drawn Sword—Stories of Plots.

Special Cable Dispatch to THE SUN.

LONDON, May 14.—Writing from Belgrade, a correspondent draws a gloomy picture of the condition of King Peter and the country. He says political and social circles are under a cloud of apprehension as to Serbia's future.

The air is full of rumors of dissensions in the great radical party, the resignation of the Cabinet, the eventual abdication of King Peter and the possible occupation of Belgrade by Austrian troops.

The rumors of abdication are declared to be premature, but it cannot be denied that the King's health is not good. His depression and insomnia have increased since his visit to Semendria and Pozarevatz, two towns that have always been sympathetic to the Karageorgevitch dynasty, but King Peter was accompanied by the three principal regicides, Coka, Mashin, Danyan and Mishitch, and the respectable citizens absented themselves, while the peasants were absorbed in gazing at the murderers of their King.

They did not look at nor cheer King Peter. The police were even forced to interfere on account of the bitter, indignant comments passed on the regicides. As his information has been such as to point to the existence of rich veins and placers in the district.

The condition of King Peter's mind is such that, owing to his attacks of insomnia, he rises often at 2 o'clock in the morning and calls the officer on duty to keep him company. He told one of these officers that he often dreams he sees King Milan running through the corridors and halls of the palace with drawn sword shouting: "Where are the murderers of my son?"

Similar dreams are apparently of frequent recurrence. The loss of sleep is beginning to have a visible effect on his health.

ARCHBISHOP WANTS TO COME.

His Grace of Canterbury Considering the Invitation to Visit This Country.

Special Cable Dispatch to THE SUN.

LONDON, May 14.—The Archbishop of Canterbury's private secretary says that the cordial invitation of Bishop Tutin makes his Lordship anxious to visit the United States next fall during the Episcopal convention. He thinks the visit would be welcomed in America as a graceful return of the visit of the American Bishops to the Lambeth conference, in 1898, at which seventy Americans were present.

The Archbishop is giving earnest consideration to the invitation. It is not settled yet, however, whether his affairs will permit of the trip, as any big State occurrence which might intervene between now and September, when he would like to go, would prevent him from crossing the ocean.

The Archbishop has not considered any details as yet, such as visits to leading cities during the trip.

PAY TO SALOON KEEPERS.

Opposition in England to Re-compensating Them for the Loss of Licenses.

Special Cable Dispatch to THE SUN.

LONDON, May 14.—There is a strong contrast between English public opinion and the attitude of Parliament in regard to the pending bill for the compensation of saloon keepers who, for public reasons, have been deprived of their licenses. The measure seems to command a large majority in the House of Commons, but the general public opinion is widespread.

The Spectator voices the average sentiment when, after declaring that it is as moral to drink a glass of beer as a glass of milk, it denounces the bill as a gross act of financial profligacy. It says:

"We have been foolish enough to give away every year monopoly rights in the sale of intoxicants for which we might have obtained many millions. Because of this bad finance in the past, Mr. Balfour now tells us we must make a further present to the trade by rendering the gift perpetual."

"Nor is this all. Next we are to take a portion of the money which ought to go to the exchequer and use it to buy back the very gifts we made. In other words, we first make a valuable annual present and then provide means for giving the recipient handsome compensation if we should ever stop the present."

X-SCIENCE PAYS FOR NOTICE.

Reports of a Meeting in London Appear as Advertising Matter.

Special Cable Dispatch to THE SUN.

LONDON, May 14.—The Christian Scientists of London have always been an unobtrusive body, but they have evidently become dissatisfied with the short reports of their meetings given by the London newspapers, and in order to insure what they regard as an adequate account of the meeting at Queen's Hall last night of welcome to Judge S. J. Hanna of Boston, they inserted a column report to-day in several papers as an advertisement.

DIDN'T IMPORT BEZDISKI.

Mr. Manda Says Bezdiski Is a Personal Friend and That He Invited Him.

TRENTON, May 14.—Suit was instituted in the United States courts, here-to-day, by the United States to recover from W. A. Manda, incorporated, of South Orange, a penalty of \$1,000 for violation of the statutes regulating the importation of contract labor. The specific charge is that the company brought to this country, from Canada, Wenzel Bezdiski, an Austrian, under a contract to give him employment as a gardener.

SOUTH ORANGE, May 14.—W. A. Manda declares the Government suit brought against him is a "put up job" on the part of someone. Bezdiski, he says, is an old personal friend whom he knew in Austria. He says that he received word from Bezdiski, who has been in Canada for several years, that he was coming to the United States. He thereupon wrote to him to come and visit him, and he did so.

"Mr. Bezdiski has been my guest," he added. "He has never been in my employ at any time, and I cannot see how I could be found guilty of any violation of the labor law. I shall certainly fight the case to a finish."

TWO WOMEN INJURED.

Ambulance Knocks Down Girl, Picks Her Up and Carries Her Along.

Special Cable Dispatch to THE SUN.

A fuse which burned out with a loud report in a Canarie car at Hamburg avenue and Madison street, Williamsburg, yesterday morning frightened the passengers, and among the women who jumped off despite the warnings of the conductor that there was no danger were Mrs. Mary Seyfried, 46 years old, of 46 Hamburg avenue and Mrs. Louisa Grace, aged 52, who lives at 22 Ten Eyck street. Mrs. Seyfried broke her left forearm. She is also suffering from shock. The other woman's face was lacerated and she received a slight concussion of the brain.

While an ambulance from the German Hospital was hurrying to the scene with Dr. Ludwig the horse knocked down four-year-old Gertrude Locker in front of her father's home at 204 Horner street. The child was severely injured. The ambulance halted and Dr. Ludwig went back after the child, whom he placed in the ambulance, and while the ambulance was on the street administered medical aid to the child. She was not dangerously wounded and he kept her in the vehicle until he had attended to both women. Then he took the girl home.

DIVORCE FOR FIRST MRS. HAGEMEYER.

Supreme Court Justice Leventritt granted a divorce yesterday to Annie M. Hagemeyer from Charles F. Hagemeyer, whom she married on Jan. 2, 1886. There are two children of the marriage, who will probably be placed in Mrs. Hagemeyer's custody. Mrs. Hagemeyer, who lives in Harlem, asserted that her husband had another wife, The Bank. His absence of nights made the first Mrs. Hagemeyer suspicious, and on investigation she began suit.

LABOR LAW MAKES TROUBLE.

Negroes Leaving Mississippi and Mills Shutting Down for Lack of Help.

NEW ORLEANS, May 14.—The labor situation in Mississippi is reaching the acute stage. A saw mill concern has gone into bankruptcy because it could not secure labor. Other mills in the southern part of the State find it necessary to close. Common labor is bringing \$1.40 a day and is hard to find.

There is a spirit of unrest among the laborers of southern Mississippi, partly because of the operations of the whitesappers and partly because the negroes are frightened by the vagrancy law. Many are leaving for Arkansas.

The mill owners think the vagrancy law may be good for the cities and large towns, but not
